

File Status	CLOSED - Committee Dec - SCERP Direction	Effective Date	20 Oct 2010
--------------------	---	-----------------------	-------------

Case Summary

On January 19, 2010, The Scarborough Hospital notified the College that the Executive Committee of the Hospital Board of Directors upheld the September 25, 2008 decision of the MAC not to reappoint Dr. Akbar Nauman Khan(FAM MED) to the medical staff as a result of Dr. Khan's ongoing inappropriate, unprofessional, disruptive communication and behaviour.

Investigation Type	Complaints	File Number	0064626
Complainant	TP	Date Received	27 Aug 2007
Investigator Assigned	MMO	Date Assigned	30 Aug 2007
File Status	CLOSED - Committee Dec - No Action	Effective Date	16 Jan 2008

Case Summary

Jan 16, 2008 CC DEC: No action. Dr. P has concerns that Dr K is using a chemical (DCA) to treat cancer patients that has not been approved by Health Canada. CC took no further action on the basis that off label treatment with DCA is not illegal and because Dr. Khan had been compliant with CPSO policy re alternative medicine. >

Investigation Type	Registrars Investigation	File Number	7211812
Complainant		Date Received	22 May 2007
Investigator Assigned	MMO	Date Assigned	07 Jun 2007
File Status	CLOSED - On Manager's Approval	Effective Date	18 Oct 2007

Case Summary

Information has been received from Dr. TP concerning Dr. Khan. Dr. P has concerns that Dr. Khan is importing and injecting DCA (dichloroacetate sodium) for use in humans, when it has not been approved by Health Canada. >

Investigation Type	Complaints	File Number	0063493
Complainant	LM	Date Received	05 Apr 2007
Investigator Assigned	MMO	Date Assigned	09 Apr 2007
File Status	CLOSED - HPARB Directed New Inv / Dec	Effective Date	08 Dec 2010

Case Summary

December 21, 2010 - All correspondence from file #63493 is now part of this file #81220. HPARB requests further investigation. Mar 5, 2008 CC DEC: No action. The daughter of the 73 year old Mrs. V. M. complained about the palliative care provided to her mother by Dr. Khan. She was suffering from advanced stage cancer and was treated by Dr. Khan at home between September 29 and her death on December 26, 2006. In particular, Ms. L. M. is concerned about the Dr. Khan's use of ketamine for pain control. She felt that he prescribed an inappropriately high dosage, and also provided the family with incorrect advice on treatment options available to them. >
